Lachlan Watts-Tobin

(707) 601-5830 • lachlanwt@berkeley.edu • linkedin.com/in/lachlanwt • lachlanwt.com

EDUCATION

University of California, Berkeley Berkeley, CA
B.S. Electrical Engineering & Computer Science (GPA: 3.3 / 4.0) May 2028
Coursework: Digital Design and Integrated Circuits (with ASIC Lab), Computer Architecture, Internet of Things, Machine Structures, Circuits and Devices, Data Structures, Signals and Information Processing, Solid Mechanics.

SKILLS

Languages: SystemVerilog, Verilog, C, C++, CUDA, Python, Chisel, Scala, RISC-V, TCL, Perl, MATLAB.
Tools: Cadence (Innovus, Indago), Synopsys (VCS, Verdi), UVM, Linux, Git, PyTorch, TensorRT, Pandas, NumPy.

EXPERIENCE

Pano AI San Francisco, CA
Hardware Engineering Intern May 2026 – August 2026
- Designed an edge-computer system layout optimizing area efficiency and minimizing power leakage.
- Authored Manufacturing Process Information (MPI) to scale edge-computer production.
- Developed a 94% accurate lens contamination detection algorithm, flagging water/debris improving visibility

Vision IV (Remote) Berkeley, CA
Hardware Engineering Intern May 2025 – July 2025
- Optimized a high-performance capacitor electrode using experimental materials to improve potential difference.
- Tested and analyzed potential failure points to guide prove the performance and reliability of the design.

UC Berkeley TAF Lab Berkeley, CA
Undergraduate Researcher Sept 2026 – Present
- Design, bring up, and optimize microcontrollers for a swarm of autonomous sailboats (USVs) for ocean sensing.
- Conduct on-site field testing and live debugging of boat electronics during on-water deployments.

PROJECTS

Skywater 130nm 5-Stage Pipelined SoC
UC Berkeley, College of Engineering, (October 2026 – Present)
- Designing a 5-stage pipelined core, with I/D caches and branch prediction in 130nm technology.

CS61CPU
UC Berkeley, College of Engineering, (November 2025 – December 2025)
- Designed a 5-stage pipelined CPU in Logisim capable of executing 32-bit RISC-V instructions.

AI-Powered Guitar Pedal
Hackathons at Berkeley, (June 20, 2026)
- Bridged AI to hardware, pushing generated parameters from plain English to an ESP32 DSP device over WiFi.

Automated Trading Card Sorter
UC Berkeley, College of Engineering, (April 2026 – May 2026)
- Engineered a 98% accurate machine that sorts trading cards by their live value, using CV, APIs and web scraping.

Self-Hosted Portfolio Website
Personal, (May 2026 – August 2026)
- Self-hosted a portfolio site on a Raspberry Pi via a tunnel with custom DNS and automated Git deploys.

Scheme Language Interpreter
UC Berkeley, College of Engineering, (March 2025 – April 2025)
- Implemented and interpreter for a subset of Lisp (Scheme) supporting core syntax, macros and expressions.

EXTRACURRICULARS

Bike Builders of Berkeley Berkeley, CA
Lead Electrical Engineer August 2024 – Present
- Lead the electrical design of the e-bike's EV drivetrain, including custom PCBs and controllers.
- Balance workloads across website, firmware, and hardware as project manager.

UC Berkeley, College of Engineering Berkeley, CA
Undergraduate Tutor July 2025 – Present
- Tutor lower-division electrical engineering and computer science coursework to students every weekday.
